

This file contains my handwritten notes listing the drugs carried by a local department. It lists the name of the drug and information about how each is supplied. **However, always check the dosage and concentration for any drug you are going to administer because many of the drugs are available in a variety of concentrations, etc.** The last two pages list only the names of the (same) drugs. These pages can be used to quiz yourself on the indications, contraindications, dosages, etc. If I get time, I'll type these up and repost but in the mean time this works. If anyone has the urge, please feel free to type it for all of us and send it to me for posting.

Bob

Cardizem 25mg (5mg/mL) in 5mL
Furosemide 100mg in 10mL (10mg/mL) prefill

Glucagon (glucagon) 1mg in 1mL reconstitute
Lidocaine HCl 2% 100mg in 5mL (20mg/mL) prefill
Atropine Sulfate 1mg in 10mL (0.1mg/mL) prefill
Calcium Chloride 10% 1g in 10mL; 13.6 mEq in 10mL } prefill
1.36 mEq/mL (100mg/mL)

Naloxone Hydrochloride 2mg in 2mL (1mg/mL) prefill
Epinephrine 1:10,000 1mg in 10mL (0.1mg/mL) prefill
Dextrose 50% 25g in 50mL (500mg/mL) prefill
Sodium Bicarbonate 8.4% 50mEq in 50mL (1mEq/mL) prefill

Actidose-Aqua 15grams in 72mL (2.5 fl oz) (208mg/mL)

Ipecac Syrup > 1 yr old 15mL + 8-16 oz H₂O, repeat in 20 if needed
↓ 1 table spoon

Aspirin 81mg / tab

Insta-Glucose 24grams / tube

Neo-Synephrine nasal insts for bleeding ctrl

Nitrolingual Spray - 400mcg / spray 12g / vial

Tetracaine Hydrochloride Ophthalmic Soln 0.5%

LOCKED

Albuterol Sulfate 2.5mg in 3mL tube?
Ipratropium Bromide 0.5mg in 2.5mL tube?
Promethazine HCl 1mL (25mg/mL) ampule
Cimetidine ~~2mL~~ 300mg in 2mL (150mg/mL) vial
Benadryl 1mL (50mg/mL) vial
Adenosine 6mg in 2mL (3mg/mL) vial
Flumazenil 0.5mg in 5mL (0.1mg/mL) vial
Solu-Medrol 125mg in 2mL reconstitute
Epinephrine 1:1000 1mL (1mg/mL) Ampule
Morphine Sulfate 1mL (10mg/mL) Ampule
Dopamine HCl 400mg in 5mL (80mg/mL) vial
Midazolam 10mg in 2mL (5mg/mL) vial
Magnesium Sulfate 50% 5grams in 10mL (0.5g/mL) vial
Nitroglycerin 50mg in 10mL (5mg/mL) vial
4.06 mEq/mL Magnesium
Diazepam 10mg in 2mL (5mg/mL)
Racemic Epinephrine Inhalation Soln 2.25% dilute c 3-5mL NS
0.5mL
